

WELCOME TO THE WONDERFUL WORLD OF COMPUTERS

It is a privilege to be working with grades K through 8 in the computer lab this year. Each grade level will experience a progression of skills being emphasized that will enable the students to continue to grow in the vast changing world of technology. Classes will be developed in collaboration with the teachers so there will be continuity between the curriculum and technology. Social and ethical issues will also be addressed in using the computers to enhance our students' understanding of computer etiquette

The following is a technology curriculum outline for grades K through 8. Different projects will be developed for each grade level as their skills progress. If you have any questions or concerns please feel free to call the school or e-mail me at jvolos@stbernardine.org.
